

# HARISON®

## Wall-mounted Dehumidifier

### HWD - series

HWD-150B

The Harison HWD range of swimming pool dehumidifier offers a comprehensive choice for small to large commercial pools. All incorporate condensing technology to provide energy efficient operation. In-room units are attractively designed and wall-mounted. They draw moist air in at the bottom and release dry air out of the top. A similar range is available to be located in an adjacent room. Air is drawn from the pool area via ducting, dried by the dehumidifier and then supplied back to the room. Floor standing systems offer high performance dehumidification as well as electric heating options that can replace the need for other space heating. These can also introduce fresh air from outside as well as vent exhaust air. Heat recovery systems maximise energy efficiency and can recover heat from the room or the dehumidification process back to the supply air.

A wide range of standard options are offered across the ranges to meet the requirements of any indoor pool area.

SPECIFICATION	Unit	Model				
		HWD-150B	HWD-192B	HWD-360B	HWD-504B	
Dehumidification Capacity (@30°C, 80%)	Kg/D	150	192	360	480	
Airflow rate	CMH	1200	2400	4000	4500	
External static pressure	Pa	100	100	80	100	
Refrigerant		R410A	R410A	R410A	R407c	
Operating temperature ranger	°C	5 ~ 40				
Power source		220V/1Ph/50Hz		380V/3Ph/50Hz		
Norminal power consumption	kW	1.7	3.0	6.0	8.5	
Dimension	Width	mm	1200	1200	1400	1400
	Depth	mm	310	360	380	380
	Height	mm	850	1100	1200	1200
Weight	kg	95	120	150	160
